Basic Information

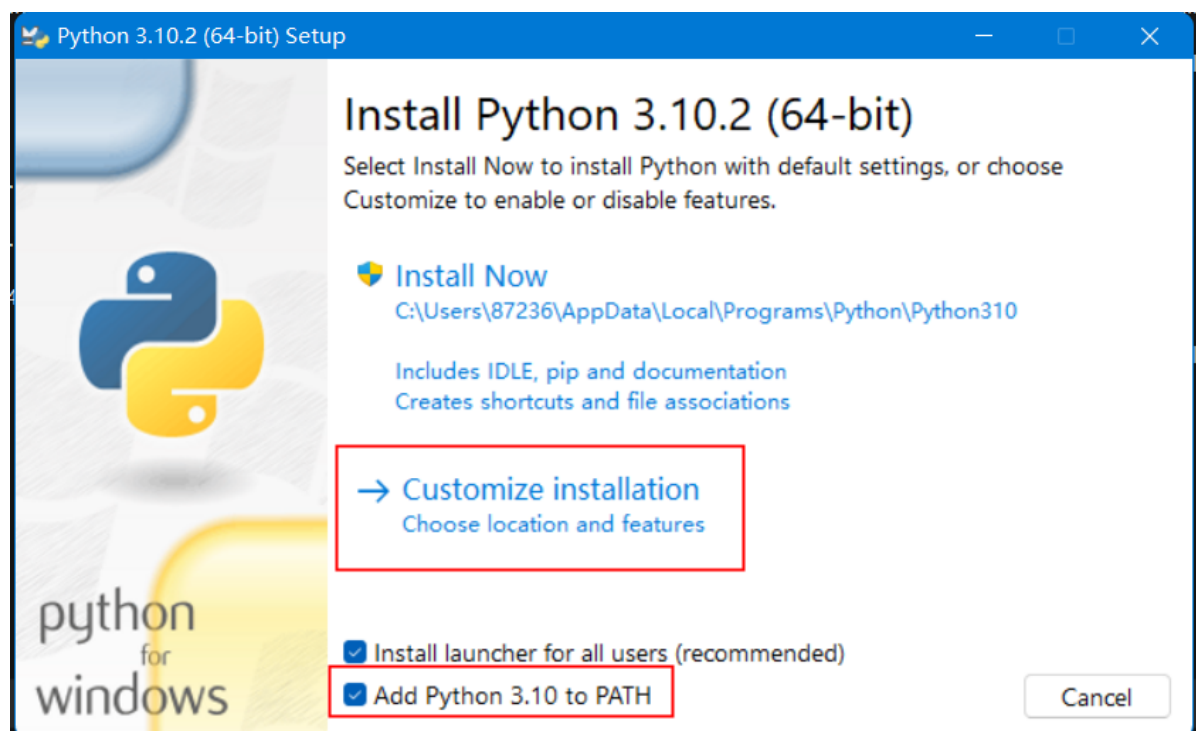

- **Smart Factory Soft Machine Vision**
- Smart Factory Innovation Club of Zhejiang University
- Class locations: 月牙楼301
- Class time: Sunday 9:30 to 11:30
- Number of students enrolled: 40

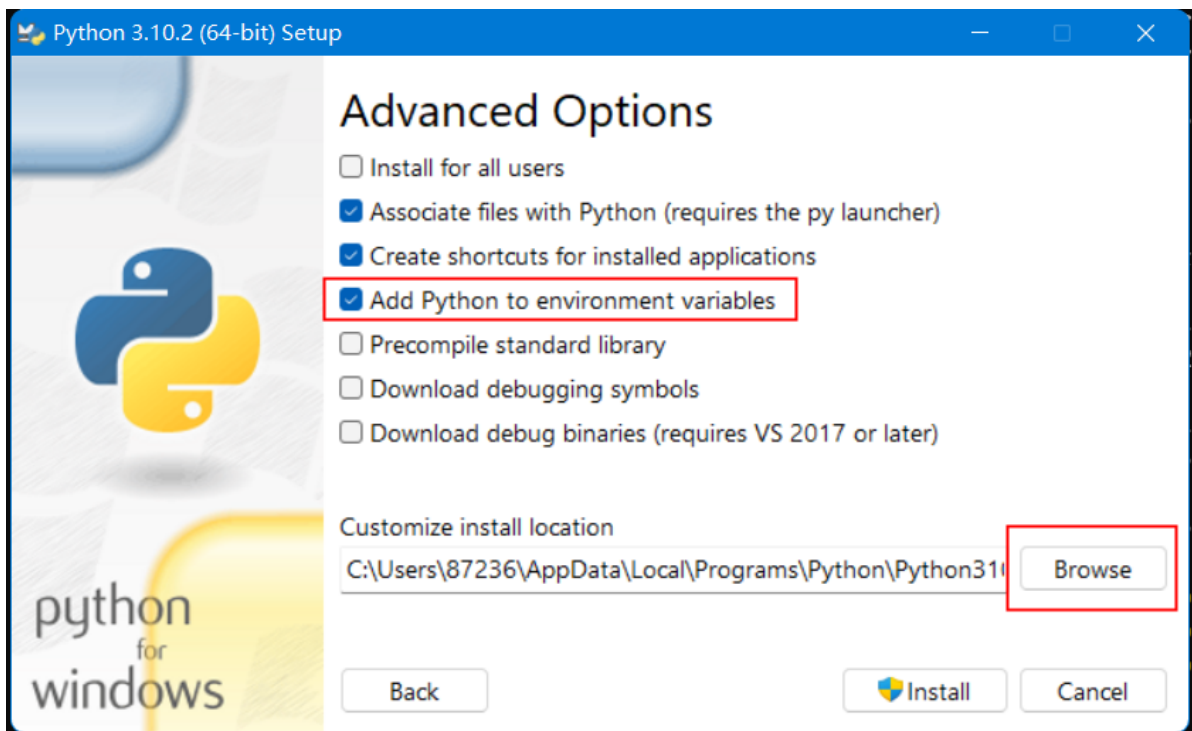

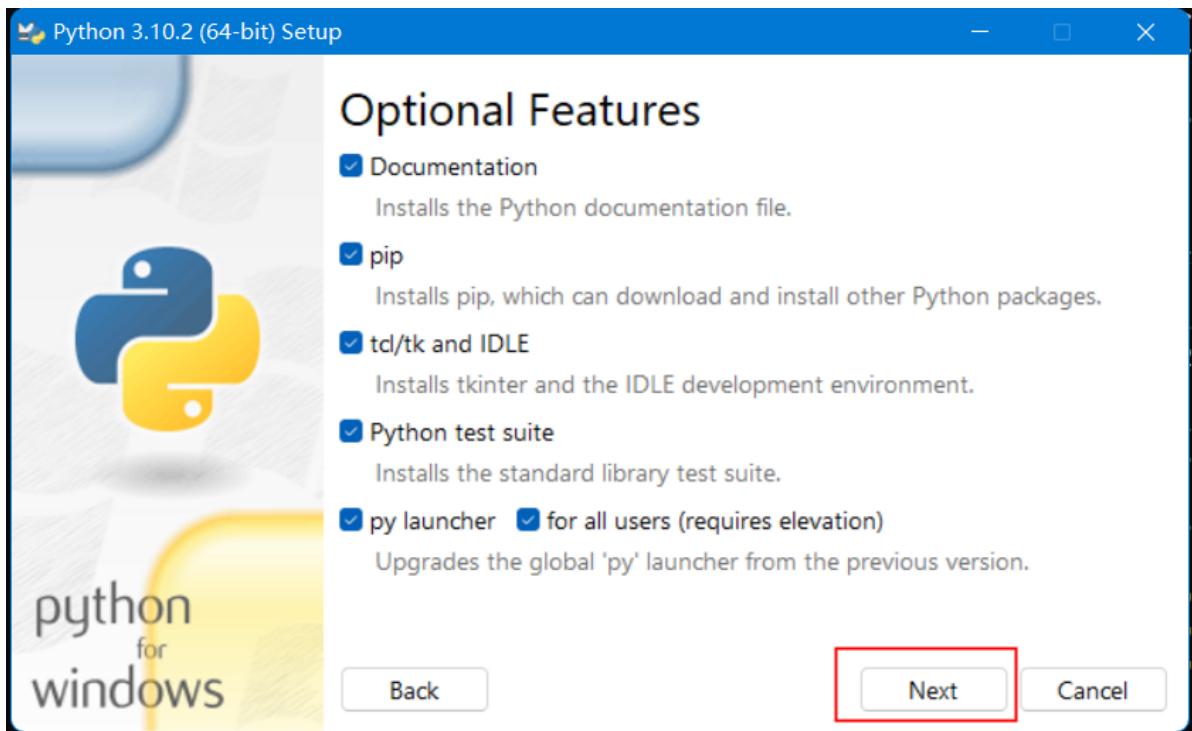

Course Outline

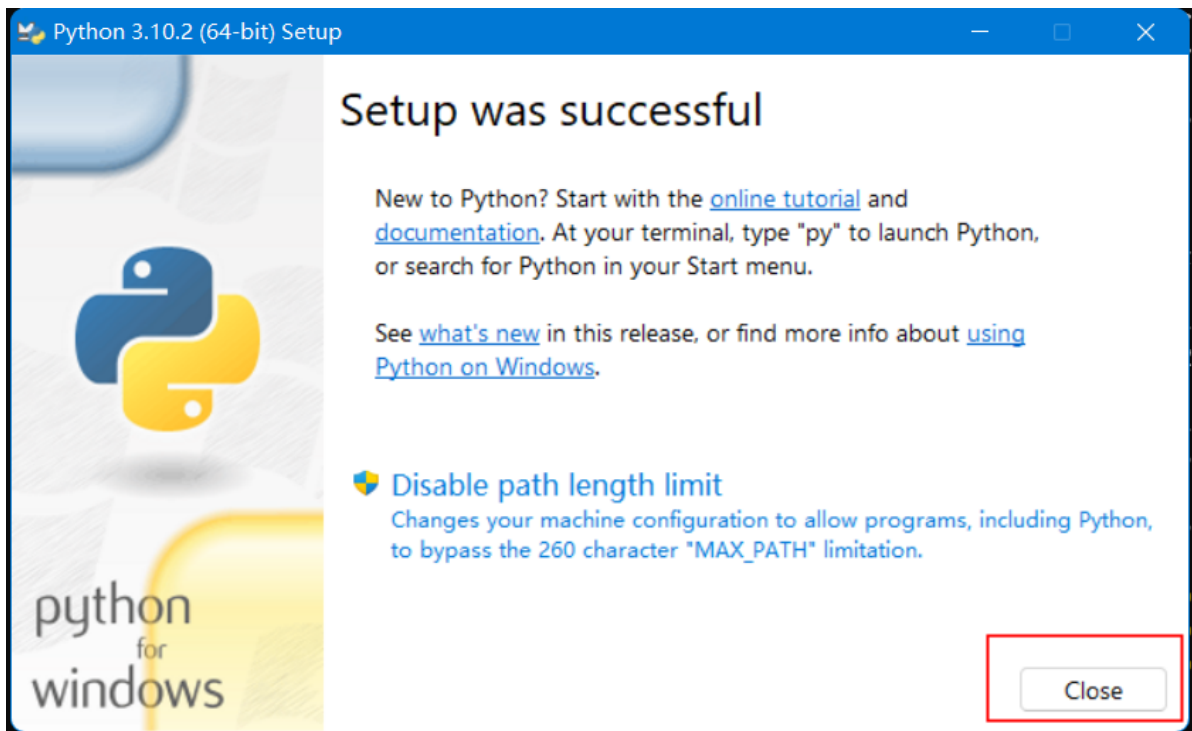

- Image basics: pixels, colors, image formats
- Image processing techniques: filtering, binarization, cutting, morphological transformation, scale and rotation transformation, image gradient
- Image pattern recognition: line and circle detection, feature point detection, edge detection, Blob detection, feature point detection, pattern recognition
- Neural Network Basics: Neuron Structure, Multilayer Perceptron, Loss Function, Gradient Descent, Back Propagation
- Neural network basics: Softmax regression, deep neural networks, convolutional neural networks
- Neural network foundation: recurrent neural network, NLP natural language processing, cloud server resources
- Big Homework and Answers: Chessboard Recognition System

Configuration

- Python3.9.9 [link](#)
- If you have installed Python 3.7 and above, you can choose not to reinstall
- If Python has not been installed or the version is lower than 3.7, please reinstall it

```
PS C:\Users\87236> F:\Python399\python.exe
